What is claimed is

1. An electronic device comprising a battery storing container having an opening for placing a battery in and out, a recording medium storing part for storing a recording medium detachably and a plurality of circuit boards constituting predetermined circuits, wherein

said recording medium storing part and said plurality of circuit boards are placed so as to surround the outside of said battery storing container except at said opening.

- 2. The electronic device according to claim 1, wherein one of said circuit boards is an image display unit.
- 15 3. The electronic device according to claim 1, wherein said battery storing container comprises six external planes forming the outside thereof, said opening is made in a first external plane, said recording medium storing part is disposed in a second external plane which is perpendicular to said first external plane, said circuit boards comprising an image display unit is disposed in a third external plane which is parallel to said second external plane and said circuit boards other than said image display unit are disposed in other three external planes other than said first to third external planes.
